Profile

Communication Design MSc student at **Politecnico di Milano**, working where physical and digital interaction meet. I take concepts from research and UX through to working prototypes, coding interfaces and building physical installations myself. I'm looking for an internship in digital product and interaction design.

Education

MSc Communication Design,
Politecnico di Milano
09/2026 - present

BSc Communication Design,
Politecnico di Milano
09/2023 - 09/2026 · 110/110

Erasmus Exchange, Faculdade de Belas-Artes, Universidade de Lisboa
02/2026 - 06/2026

Languages

Italian (native)
English (C1, EF certificate)
Spanish (B1)
Portuguese (A2)

Selected works

Fragma: speculative design installation
2025/26 - team of 6
A fictional "semantic engineering" company exploring cognitive warfare. In its installation, Syntax F-1, visitors move pieces on a physical board to change linguistic parameters, and an LLM rewrites a news story in real time.
I prototyped the interactive board and coded the interaction between physical input and the on-screen output.

EsploraMi: service design, mobile app
2025 - team of 5
An app against overtourism in Milan. It builds a personalised calendar and map from the user's profile, and uses IGPDecaux urban-flow data to suggest the least crowded times.
I worked on user flows, UI and the coded prototype.

Sound Morphology: experimental web experience
2025 - team of 6
An immersive archive for DJ and producer GNMR, explorable through a text menu or an interactive particle "jellyfish" map.
I worked on coding, UI and UX.

Space Debris: interactive data visualization
2024 - team of 6
More than 15,000 records on orbital debris, with an interactive timeline and a country filter.
I worked on dataset processing, UI and coding.

Futbol: personal web project
2026
An archive of historic football shirts, with an infinite-scroll grid, detail pages and a "which shirt are you?" quiz.
I designed, coded and edited the photos independently.

Skills

Design:
Figma, Adobe Creative Cloud (Illustrator, Photoshop, InDesign)

Code & prototyping:
HTML, CSS, JavaScript, p5.js, Webflow, Arduino / physical computing

Methods:
UX flows, wireframing, prototyping, data visualization, speculative design, analog photography
